Alberta's International Merchandise Exports
January – March 2007
Highlights

Overview: In the first quarter of 2007, the value of Alberta's international merchandise exports grew by 3.8% from the same quarter last year, to $21.8 billion. This increase was largely the result of higher exports of crude oil, primary metals, crops and machinery. Natural gas exports decreased by 6.4% or $472 million as lower prices more than offset higher volumes. Excluding natural gas, merchandise exports rose 9.3%. Export volumes rose an estimated 4.5% in the first quarter, because of strong gains for natural gas, machinery, and primary and fabricated metals.

Major Commodities: Higher prices and volumes fuelled exports of nickel, wheat, ethylene glycol, and oil pipeline in the first three months. Price increases led to gains for crude oil, canola and wood pulp. Urea, telephone equipment, ammonia and coal advanced on higher volumes. Lower prices and volumes caused declines in shipments of oriented strand board, sulphur, lumber and acyclic hydrocarbons. Lower prices resulted in lower natural gas, ethylene polymers and polyethylene deliveries.

Exports by Industry: *Mining and energy* exports were up 1.5% because of higher crude oil prices. *Primary agricultural* exports climbed by 23.0%: improved crops shipments offset lower livestock deliveries. *Manufacturing* exports rose 8.2% because of volume and price gains. Large export gains were noted for the primary metal and fabricated products, and machinery industries.

North America: U.S. imports of Alberta merchandise grew by 1.7%, primarily as a result of increases in crude oil and oil pipeline deliveries. Large increases were also noted for wood pulp, drilling machinery and surveying instruments. Mexican imports increased by 15.0% due to higher wheat and fresh boneless beef deliveries.

Asia: Exports to Asia jumped by 26.3% due to large increases for nickel, ethylene glycol, canola and canola oil. Exports to China were sharply higher by 56.0% because of higher shipments of nickel, ethylene glycol and canola oil. Japan's imports of Alberta goods grew by 11.5% due to hay and cobalt deliveries. Shipments to Pakistan more than doubled because of higher canola exports.

Europe: European imports increased strongly by 55.9% largely because of a three-fold increase in nickel. Large increases were also registered for truck trailers and cobalt deliveries. Exports to Belgium, the Netherlands, Italy and Spain rose strongly. The Netherlands is Alberta's fifth largest trading partner in 2007.

Middle East and North Africa: Exports to the Middle East and North Africa were up 12.1% due in large part to a jump in wheat sales to Iraq. Drilling equipment and parts remain a top export to the region.

Other Regions: South American imports remained virtually unchanged. Wheat and sulphur were the top exports to the area. Central American imports dropped by 47.9% as a result of a $42 million decrease in diesel and fuel oil sales to Guatemala. Exports to the Commonwealth of Independent States declined by 6.9% as pump and compressor sales to Kazakhstan fell. A rise in wood pulp, especially to Australia, fuelled an 11.8% increase in imports by the Oceania region. Sub-Saharan Africa's imports climbed sharply by 64.9% because of increased shipments of wheat to Sudan and South Africa.

ALBERTA'S INTERNATIONAL MERCHANDISE EXPORTS

* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, most of the natural gas exports assigned to Washington are destined for California.

* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, most of the natural gas exports assigned to Washington are destined for California.

Source of the data is Statistics Canada, aggregations by Alberta Employment, Immigration and Industry.
